

CONVERTER, 74 IN Wire Length with 4-Flat

INSTALLATION INSTRUCTIONS

⚠ WARNING: The attachment and installation of this product is beyond the control of Winston Products, LLC. Winston Products, LLC is not responsible for the attachment or the installation of this product. Winston Products, LLC is not liable for damages and/or injuries that are the result of improper use/attachment or are the result of use beyond the intended towing application. The liability of this product is limited to the purchase price if it proves to be defective in material and/or workmanship. Any and all warranties, explicit or implied, are void if the product is damaged or worn.

IMPORTANT: Before installing any converter, review the vehicle owner's manual. Many modern vehicles have sophisticated electrical systems which could be damaged if the restrictions are ignored.

For use on tow vehicles with independent bulb turn signals separate from the brake light.

WIRE IDENTIFICATION:

White = Ground
Brown = Taillight
Yellow = Left Turn
Green = Right Turn
Red = Brake

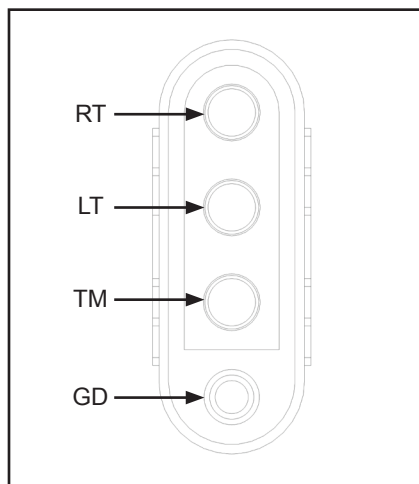

1. Chose an installation location at the rear of the tow vehicle or inside trunk where the converter will be protected. Avoid exhaust systems, shock absorbers and drive train.
2. Attach each of the 5 wires to the corresponding /same function on the vehicle using the wire identification chart.
3. Attach the white ground wire to the vehicle frame or solid metal surface free of rust or paint.
4. Connect 4-Flat to trailer and test all functions.

NOTES:

A heavy-duty flasher may be needed to eliminate rapid flashing.

Do not exceed 2.1 Amps per stop/turn function.

Locate wires and pin location by function on tow vehicle or trailer. Color coding is not standard among manufacturers.
